## INDEX TO AUTHORS

A

**Ansbacher, S.** See SUPPLEE, ANSBACHER, and BENDER, 365

**Arnow, L. Earle.** Physicochemical effects produced by the irradiation of crystalline egg albumin solutions with $\alpha$ particles, 43

**Avery, Bennett F., Kerr, Stanley E.,** and **Ghantus, Musa.** The lactic acid content of mamalian brain, 637

B

**Babers, Frank H.** See GOEBEL and BABERS, 707

**Baur, Lorenz.** See MORELL, BAUR, and LINK, 719

**Behre, Jeanette Allen,** and **Benedict, Stanley R.** On the presence of creatinine in blood, 245

**Bender, R. C.** See SUPPLEE, ANSBACHER, and BENDER, 365

**Benedict, Stanley R.** See BEHRE and BENEDICT, 245

**Bergmann, Max.** Complex salts of amino acids and peptides. II. Determination of *l*-proline with the aid of rhodanilic acid. The structure of gelatin, 471

— and **Grafe, Karl.** New reactions of lactobiose and cellobiose, 173

**Bernhard, Adolph.** See DREKTER, BERNHARD, and LEOPOLD, 541

**Bernheim, Frederick, Bernheim, Mary L. C.,** and **Webster, M. Dorothy.** Oxidation of certain amino acids by "resting" *Bacillus proteus*, 165

**Bernheim, Mary L. C.** See BERNHEIM, BERNHEIM, and WEBSTER, 165

**Bessey, Otto A.** See CAMPBELL, BESSEY, and SHERMAN, 703

**Biskind, Gerson R.** See GLICK and BISKIND, 1, 575, 583

**Blanchard, Kenneth C.,** and **MacDonald, Joseph.** Bacterial metabolism. I. The reduction of propionaldehyde and of propionic acid by *Clostridium acetobutylicum*, 145

**Blau, Nathan F.** The determination of thyroxine in thyroid substance, 351

**Block, Richard J.** See BRAND, CAHILL, and BLOCK, 399

**Blumenthal, Doris,** and **Clarke, H. T.** Unrecognized forms of sulfur in proteins, 343

**Borsook, Henry.** Micromethods for determination of ammonia, urea, total nitrogen, uric acid, creatinine (and creatine), and allantoin, 481

— and **Jeffreys, Cecil E. P.** Nitrogen metabolism of the isolated tissues of the rat, 495

**Boyd, Eldon M.** Diurnal variations in plasma lipids, 61

**Boyd, William C.,** and **Mover, Paul.** A note on azoproteins, 457

**Brand, Erwin, Cahill, George F.,** and **Block, Richard J.** Cystinuria. IV. The metabolism of homocysteine and homocystine, 399

**Brock, Henry J.** See HUBBARD and BROCK, 411

**Brown, W. L.** A contribution to the chemistry of pepper pigments. The red pigment in the Perfection pimiento (*Capsicum annuum*), 91

**Bryan, Hilah F.** See MACHT and BRYAN, 101

**Burrows, W. H., Fritz, J. C.,** and **Titus, Harry W.** The blood sugar of the fasting, gizzardectomized fowl (*Gallus domesticus*), 39

C

**Cahill, George F.** See BRAND, CAHILL, and BLOCK, 399

**Caldwell, M. L.,** and **Doebbeling, S. E.** A study of the concentration and properties of two amylases of barley malt, 739

**Campbell, H. L., Bessey, Otto A.,** and **Sherman, H. C.** Adult rats of low calcium content, 703

**Cavett, J. W., Rice, Carl O.,** and **McClendon, J. F.** Thyroglobulin studies. I. The thyroxine and iodine content of normal and goitrous human thyroglobulin, 673

**Chichester, Donald F.** See MORGAN and CHICHESTER, 285

**Clarke, H. T.** See BLUMENTHAL and CLARKE, 343

**Craig, Lyman C.** See JACOBS and CRAIG, 521

D

**Dam, Henrik.** See SCHOENHEIMER, DAM, and VON GOTTBERG, 659, 667

**Doebbeling, S. E.** See CALDWELL and DOEBBELING, 739

**Downes, Helen R.,** and **Richards, Leah.** A note on the concentration of the antidiuretic factor of the anterior lobe of the pituitary, 81

**Drekter, I. J., Bernhard, Adolph,** and **Leopold, Jerome S.** The extraction of cholesterol from blood serum, 541

**Dutcher, R. Adams.** See GUERRANT, DUTCHER, and TOMEY, 233

E

**Eastman, Irene M.,** and **Miller, Edgar G., Jr.** Gastrointestinal pH in rats as determined by the glass electrode, 255

**Enklewitz, Morris,** and **Lasker, Margaret.** The origin of *l*-xyloketose (urine pentose), 443

F

**Farrar, George E., Jr.** The determination of iron in biological materials, 685

**Fashena, Gladys J.** See TREVORROW and FASHENA, 29

XUM

**Fincke, M. L.,** and **Sherman, H. C.** The availability of calcium from some typical foods, 421

**Frayser, Lois.** See LEWIS and FRAYSER, 23

**Fritz, J. C.** See BURROWS, FRITZ, and TITUS, 39

G

**Ghantus, Musa.** See AVERY, KERR, and GHANTUS, 637

**Glick, David,** and **Biskind, Gerson R.** The histochemistry of the adrenal gland. I. The quantitative distribution of vitamin C, 1

— and —. II. The quantitative distribution of lipolytic enzymes, 575

— and —. The histochemistry of the hypophysis cerebri. The quantitative distribution of vitamin C, 583

**Goebel, Walther F.** Chemo-immunological studies on the soluble specific substance of pneumococcus. II. The chemical basis for the immunological relationship between the capsular polysaccharides of Types III and VIII pneumococcus, 391

— and **Babers, Frank H.** Derivatives of glucuronic acid. V. The synthesis of glucuronides, 707

**Gordon, William G.,** and **Jackson, Richard W.** The metabolism of certain monomethyltryptophanes, 151

**von Gottberg, Klemens.** See SCHOENHEIMER, DAM, and VON GOTTBERG, 659, 667

**Grafe, Karl.** See BERGMANN and GRAFE, 173

**Graff, Samuel,** and **Maculla, Ada.** The composition of the tissue proteins. I. The estimation of purines in tissues, 71

**Greenstein, Jesse P.,** and **Joseph, Norman R.** Studies of multivalent amino acids and peptides. IV. The apparent dissociation constants of $\alpha$-aminotricarballylic acid and of glycyl - $\alpha$ - aminotricarballylic acid, 619

**Guerrant, N. B., Dutcher, R. Adams,** and **Tomey, L. F.** The effect of the type of carbohydrate on the synthesis of the B vitamins in the digestive tract of the rat, 233

**Guest, George Martin,** and **Holmes, Frederic E.** A pipette for storage of air-free reagents used in gasometric analysis, 781

— and **Leva, Ernst.** An electric heater designed to prevent losses from creeping in the evaporation of concentrated salt solutions preliminary to mineral analysis, 777

H

**Haag, J. R.,** and **Jones, I. R.** The calcium and inorganic phosphorus content of the blood plasma of normal dairy cattle, 439

**Holmes, Frederic E.** See GUEST and HOLMES, 781

**Hubbard, Roger S.,** and **Brock, Henry J.** Lactose in the plasma of pregnant and lactating women, 411

J

**Jackson, Richard W.** See GORDON and JACKSON, 151

**Jacobs, Walter A.,** and **Craig, Lyman C.** The ergot alkaloids. V. The hydrolysis of ergotinine, 521

— and **Simpson, James C. E.** The digitalis sapogenins, 429

—. See SIMPSON and JACOBS, 565

**Jeffreys, Cecil E. P.** See BORSOOK and JEFFREYS, 495

**Johnstin, Ruth,** and **Potter, Kathryn Sue.** Galacturonic acid as a precursor of ascorbic acid, 279

**Jones, I. R.** See HAAG and JONES, 439

**Joseph, Norman R.** See GREENSTEIN and JOSEPH, 619

**Jukes, Thomas H.,** and **Schmidt, Carl L. A.** The combination of certain fatty acids with lysine, arginine, and salmine, 9

K

**Kelley, Edward G.** Reactions of dyes with cell substances. III. An apparatus for the definition of color in stained histological sections, 141

— and **Miller, Edgar G., Jr.** Reactions of dyes with cell substances. I. Staining of isolated nuclear substances, 113

**Kelley, Edward G.,** and **Miller, Edgar G., Jr.** II. The differential staining of nucleoprotein and mucin by thionine and similar dyes, 119

**Kerr, Stanley E.** Studies on the phosphorus compounds of brain. I. Phosphocreatine, 625

—. See AVERY, KERR, and GHANTUS, 637

**Kibrick, Andre C.** See BLAU, 351

**Kinsey, V. Everett.** The effect of x-rays on glutathione, 551

**Kleiner, Israel S.** See TAUBER and KLEINER, 559

—. See TAUBER, KLEINER, and MISHKIND, 211

**Kuna, Martin.** See LEVENE, 323

L

**Lasker, Margaret.** See ENKLEWITZ and LASKER, 443

**Leopold, Jerome S.** See DREKTER, BERNHARD, and LEOPOLD, 541

**Leva, Ernst.** See GUEST and LEVA, 777

**Levene, P. A.** The configurational relationships of the derivatives of methylbenzyl- and methylphenethyl-, methylheptyl- and methyloctylacetic acids, 323

— and **Marker, R. E.** The configurational relationship of acids of the phenethyl series to those of the normal series, 311

**Levene, P. A.** and **Marker, R. E.** The configurational relationship of methylbenzylacetic to methylbenzylpropionic acid, 299
— and —. The maximum rotations of configurationally related carboxylic acids containing a phenyl or a cyclohexyl group, 329
**Lewis, Howard B.,** and **Frayser, Lois.** The metabolism of sulfur. XXII. The cystine content of the hair and nails of cystinurics, 23
**Link, Karl Paul.** See MORELL, BAUR, and LINK, 719
—. See NIEMANN, ROBERTS, and LINK, 727
**Logan, Milan A.** Composition of cartilage, bone, dentin, and enamel, 375

M

**MacDonald, Joseph.** See BLANCHARD and MACDONALD, 145
**Macht, David I.,** and **Bryan, Hilah F.** Synergistic action of milk and muscle oxidases, 101
**Maculla, Ada.** See GRAFF and MACULLA, 71
**Marker, R. E.** See LEVENE and MARKER, 299, 311, 329
**Matlack, M. B.** Pigments of pink grapefruits, *Citrus grandis* (L., Osbeck), 249
**Mattill, H. A.** See SEEGERS and MATTILL, 531
**McClendon, J. F.** See CAVETT, RICE, and MCCLENDON, 673
**Miller, Edgar G., Jr.** See EASTMAN and MILLER, 255
—. See KELLEY and MILLER, 113, 119
**Mishkind, Daniel.** See TAUBER, KLEINER, and MISHKIND, 211
**Montgomery, Hugh.** Quantitative studies of the composition of glomerular urine. XII. The reaction of glomerular urine of frogs and *Necturi*, 749
—. See PIERCE and MONTGOMERY, 763
**Morell, Sam, Baur, Lorenz,** and **Link, Karl Paul.** Derivatives of *d*-galacturonic acid. II. The synthesis of $\alpha$-acetobromo-*d*-galacturonic acid methyl ester and its conversion to $\beta$-methyl-*d*-galacturonide, 719
**Morgan, Vincent E.,** and **Chichester, Donald F.** Properties of the blood of the domestic fowl, 285
**Mover, Paul.** See BOYD and MOVER, 457
**Munro, Muriel Platt.** See SCHROEDER, MUNRO, and WEIL, 181

N

**Niemann, Carl, Roberts, R. H.,** and **Link, Karl Paul.** The isolation and characterization of a starch polysaccharide from the woody tissue of the apple tree (*Malus malus*), 727
**Nutter, Pauline.** See SANDS and NUTTER, 17

O

**Olcott, H. S.** Vitamin E. III. Evidence for the presence of a hydroxyl group. The biological utilization of esters. Absorption spectrum, 695

P

**Pierce, J. A.,** and **Montgomery, Hugh.** A microquinhydrone electrode: its application to the determination of the pH of glomerular urine of *Necturus*, 763

**Potter, Kathryn Sue.** See JOHNSTIN and POTTER, 279

Q

**Quick, Armand J.** The effect of exercise on the excretion of uric acid. With a note on the influence of benzoic acid on uric acid elimination in liver diseases, 107

R

**Rice, Carl O.** See CAVETT, RICE, and MCCLENDON, 673

**Richards, Leah.** See DOWNES and RICHARDS, 81

**Roberts, R. H.** See NIEMANN, ROBERTS, and LINK, 727

S

**Samisch, Rudolf.** The measurement of phenolase activity, 643

**Sands, Lila,** and **Nutter, Pauline.** The hemicelluloses extracted from mesquite wood after chlorination, 17

**Schmidt, Carl L. A.** See JUKES and SCHMIDT, 9

**Schmidt, Clarence F., Jr.** The formation of fatty acids from glucose by *Aspergillus niger*, 511

**Schoenheimer, Rudolf.** The action of iodides on sterol dibromides and the preparation of cholestenone, 461

—, **Dam, Henrik,** and **von Gottberg, Klemens.** The absence of allocholesterol in the organism, 659

—, —, and —. The absorbability of allocholesterol, 667

—. See SPERRY and SCHOENHEIMER, 655

**Schroeder, E. F., Munro, Muriel Platt,** and **Weil, Leopold.** Glyoxalase. V. The enzymatic nature of kidney antiglyoxalase, 181

**Seegers, Walter H.,** and **Mattill, H. A.** The effect of heat and hot alcohol on liver proteins, 531

**Sherman, H. C.** See CAMPBELL, BESSEY, and SHERMAN, 703

—. See FINCKE and SHERMAN, 421

**Shinohara, Kamenosuke.** The determination of thiol and disulfide compounds, with special reference to cysteine and cystine. II. A critical study of the reaction between phospho-18-tungstic acid reagent and other substances than thiol compounds, 263

**Simpson, James C. E.,** and **Jacobs, Walter A.** Sarsasapogenin. III. Desoxysarsasapogenin. Further degradations of sarsasapogenin, 565

—. See JACOBS and SIMPSON, 429

**Sperry, Warren M.,** and **Schoenheimer, Rudolf.** A comparison of serum, heparinized plasma, and oxalated plasma in regard to cholesterol content, 655

**Stekol, Jakob A.** Metabolism of naphthalene in adult and growing dogs, 463

**Supplee, G. C., Ansbacher, S.,** and **Bender, R. C.** Photochemical phenomena involved in vitamin G ($B_2$) studies, 365

T

**Tauber, Henry,** and **Kleiner, Israel S.** An enzymic method for the estimation of true vitamin C, 559

—, —, and **Mishkind, Daniel.** Ascorbic acid (vitamin C) oxidase, 211

**Titus, Harry W.** See Burrows, Fritz, and Titus, 39

**Tomey, L. F.** See Guerrant, Dutcher, and Tomey, 233

**Trevorrow, Virginia,** and **Fashena, Gladys J.** The determination of iodine in biological material, 29

W

**Webster, M. Dorothy.** See Bernheim, Bernheim, and Webster, 165

**Weil, Leopold.** The activation of arginase, 201

—. See Schroeder, Munro, and Weil, 181

**Weinbach, Ancel P.** A micromethod for the determination of sodium, 95

**Williams, Roger J.** Fractional electrical transport as a tool in biochemical research, 589

**Wood, William B., Jr.** A preliminary physicochemical study of the reducing action of glucose, 219

Z

**Zozaya, José.** A physicochemical study of blood sera, 599

# INDEX TO SUBJECTS

## A

**Acetic acid:** Methylbenzyl- and methylphenethyl-, derivatives, configurational relationship (LEVENE) 323

—, methylbenzylpropionic acid, configurational relationship (LEVENE and MARKER) 299

Methylheptyl- and methyloctyl-, derivatives, configurational relationship (LEVENE) 323

**Acetobromo-*d*-galacturonic acid:** $\alpha$-, methyl ester, $\beta$-methyl-*d*-galacturonide conversion to (MORELL, BAUR, and LINK) 719

—, — —, synthesis (MORELL, BAUR, and LINK) 719

**Adrenals:** Lipolytic enzymes, distribution (GLICK and BISKIND) 575

Vitamin C distribution (GLICK and BISKIND) 1

**Albumin:** Egg, crystalline, solutions, $\alpha$ particles, irradiation effect (ARNOW) 43

**Alcohol:** Liver proteins, effect (SEEGERS and MATTILL) 531

**Alkaloids:** Ergot (JACOBS and CRAIG) 521

**Allantoin:** Microdetermination (BORSOOK) 481

**Allocholesterol:** Absorption (SCHOENHEIMER, DAM, and VON GOTTBERG) 667

Body, absence (SCHOENHEIMER, DAM, and VON GOTTBERG) 659

**Amino acids:** Multivalent (GREENSTEIN and JOSEPH) 619

Oxidation, *Bacillus proteus* (BERNHEIM, BERNHEIM, and WEBSTER) 165

Salts, complex (BERGMANN) 471

**Aminotricarballylic acid:** $\alpha$-, dissociation constants, apparent (GREENSTEIN and JOSEPH) 619

**Ammonia:** Microdetermination (BORSOOK) 481

**Amylase:** Barley malt, concentration and properties (CALDWELL and DOEBBELING) 739

**Antiglyoxalase:** Kidney (SCHROEDER, MUNRO, and WEIL) 181

**Apparatus:** Gasometric analysis, pipette, air-free reagents, storage (GUEST and HOLMES) 781

Histological sections, stained, color definition (KELLEY) 141

Microquinhydrone electrode (PIERCE and MONTGOMERY) 763

**Apparatus**—*continued:*
Mineral analysis, evaporation, concentrated salt solutions (GUEST and LEVA) 777
**Apple tree:** Woody tissue, starch polysaccharide, isolation and properties (NIEMANN, ROBERTS, and LINK) 727
**Arginase:** Activation (WEIL) 201
**Arginine:** Fatty acids, combination (JUKES and SCHMIDT) 9
**Ascorbic acid:** Galacturonic acid as precursor (JOHNSTIN and POTTER) 279
Oxidase (TAUBER, KLEINER, and MISHKIND) 211
**Aspergillus niger:** Fatty acids, formation, from glucose (SCHMIDT) 511
**Azoproteins:** (BOYD and MOYER) 457

B

**Bacillus proteus:** Amino acids, oxidation (BERNHEIM, BERNHEIM, and WEBSTER) 165
**Bacteria:** Metabolism (BLANCHARD and MACDONALD) 145
*See also Clostridium acetobutylicum*
**Barley:** Malt, amylase, concentration and properties (CALDWELL and DOEBBELING) 739
**Benzoic acid:** Uric acid excretion, liver disease, influence (QUICK) 107
**Blood:** Fowl, domestic, properties (MORGAN and CHICHESTER) 285
**Blood plasma:** Lipids, diurnal variations (BOYD) 61
**Blood serum:** Physicochemical study (ZOZAYA) 599
**Blood sugar:** Fowl, fasting, gizzardectomized (BURROWS, FRITZ, and TITUS) 39
**Bone:** Composition (LOGAN) 375
**Brain:** Mammalian, lactic acid (AVERY, KERR, and GHANTUS) 637
Phosphocreatine (KERR) 625

C

**Calcium:** Blood plasma, dairy cattle (HAAG and JONES) 439
Foods, availability (FINCKE and SHERMAN) 421
-Low adult rats (CAMPBELL, BESSEY, and SHERMAN) 703
**Capsicum annuum:** *See* Pimiento
**Carballylic acid:** α-Aminotri-, dissociation constants, apparent (GREENSTEIN and JOSEPH) 619
Glycyl-α-aminotri-, dissociation constants, apparent (GREENSTEIN and JOSEPH) 619
**Carbohydrate:** Vitamin B synthesis, digestive tract (GUERRANT, DUTCHER, and TOMEY) 233
**Carboxylic acids:** Phenyl or cyclohexyl group-containing, maximum rotations (LEVENE and MARKER) 329
**Cartilage:** Composition (LOGAN) 375

**Cell:** Substances, dyes, reactions (KELLEY and MILLER) 113, 119
(KELLEY) 141
**Cellobiose:** Reactions, new (BERGMANN and GRAFE) 173
**Cholestenone:** Preparation (SCHOENHEIMER) 461
**Cholesterol:** Allo-, absorption (SCHOENHEIMER, DAM, and VON GOTTBERG) 667
—, body, absence (SCHOENHEIMER, DAM, and VON GOTTBERG) 659
Blood serum and plasma, heparinized and oxalated, comparison (SPERRY and SCHOENHEIMER) 655
— —, extraction (DREKTER, BERHNARD, and LEOPOLD) 541
**Citrus grandis:** *See* Grapefruit
**Clostridium acetobutylicum:** Propionaldehyde and propionic acid reduction (BLANCHARD and MACDONALD) 145
**Color:** Histological sections, stained, definition (KELLEY) 141
**Creatine:** Microdetermination (BORSOOK) 481
**Creatinine:** Blood (BEHRE and BENEDICT) 245
Microdetermination (BORSOOK) 481
**Cysteine:** Determination (SHINOHARA) 263
Homo-, metabolism, cystinuria (BRAND, CAHILL, and BLOCK) 399
**Cystine:** Determination (SHINOHARA) 263
Hair, cystinuria (LEWIS and FRAYSER) 23
Homo-, metabolism, cystinuria (BRAND, CAHILL, and BLOCK) 399
Nails, cystinuria (LEWIS and FRAYSER) 23
**Cystinuria:** Hair and nails, cystine (LEWIS and FRAYSER) 23
Homocysteine and homocystine metabolism (BRAND, CAHILL, and BLOCK) 399

D

**Dentin:** Composition (LOGAN) 375
**Desoxysarsasapogenin:** (SIMPSON and JACOBS) 565
**Digitalis:** Sapogenins (JACOBS and SIMPSON) 429
**Disulfide compounds:** Determination (SHINOHARA) 263
**Diuresis:** Antidiuretic factor, pituitary, anterior (DOWNES and RICHARDS) 81
**Dyes:** Cell substances, reactions (KELLEY) 141
Mucin, staining (KELLEY and MILLER) 119
Nuclear substances, staining (KELLEY and MILLER) 113
Nucleoprotein, staining (KELLEY and MILLER) 119

E

**Egg:** Albumin, crystalline, solutions, $\alpha$ particles, irradiation effect (ARNOW) 43

**Electric heater:** Mineral analysis, evaporation, concentrated salt solutions (GUEST and LEVA) 777
**Electrical transport:** Fractional, analytical use (WILLIAMS) 589
**Electrode:** Microquinhydrone, urine, glomerulus, hydrogen ion concentration determination (PIERCE and MONTGOMERY) 763
**Enamel:** Composition (LOGAN) 375
**Enzymes:** Lipolytic, adrenals, distribution (GLICK and BISKIND) 575
Vitamin C determination (TAUBER and KLEINER) 559
*See also* Amylase, Antiglyoxalase, Arginase, Oxidase, Phenolase
**Ergot:** Alkaloids (JACOBS and CRAIG) 521
**Ergotinine:** Hydrolysis (JACOBS and CRAIG) 521
**Exercise:** Uric acid excretion, effect (QUICK) 107

F

**Fasting:** Blood sugar, fowl, gizzardectomized (BURROWS, FRITZ, and TITUS) 39
**Fatty acids:** Arginine combination (JUKES and SCHMIDT) 9
Formation from glucose by *Aspergillus niger* (SCHMIDT) 511
Lysine combination (JUKES and SCHMIDT) 9
Salmine combination (JUKES and SCHMIDT) 9
**Foods:** Calcium availability (FINCKE and SHERMAN) 421
**Fowl:** Blood sugar, gizzardectomy effect (BURROWS, FRITZ, and TITUS) 39
Domestic, blood, properties (MORGAN and CHICHESTER) 285

G

**Galacturonic acid:** Ascorbic acid precursor (JOHNSTIN and POTTER) 279
*d*-, α-acetobromo-, methyl ester, β-methyl-*d*-galacturonide, conversion to (MORELL, BAUR, and LINK) 719
—, —, — —, synthesis (MORELL, BAUR, and LINK) 719
**Galacturonide:** β-Methyl-*d*-, α-acetobromo-*d*-galacturonic acid methyl ester, conversion from (MORELL, BAUR, and LINK) 719
**Gallus domesticus:** *See* Fowl
**Gas:** Analysis, pipette, air-free reagents, storage (GUEST and HOLMES) 781
**Gastrointestinal tract:** Hydrogen ion concentration determination, glass electrode (EASTMAN and MILLER) 255
**Gelatin:** Chemical constitution (BERGMANN) 471
**Glomerulus:** Urine, hydrogen ion concentration determination, microquinhydrone electrode, *Necturus* (PIERCE and MONTGOMERY) 763
—, reaction, frog and *Necturus* (MONTGOMERY) 749

**Glucose:** Fatty acids, formation, by *Aspergillus niger* (SCHMIDT) 511
Reducing action, physicochemical study (WOOD) 219
**Glucuronic acid:** Derivatives (GOEBEL and BABERS) 707
**Glucuronides:** Synthesis (GOEBEL and BABERS) 707
**Glutathione:** x-Ray, effect (KINSEY) 551
**Glycyl-α-aminotricarballylicacid:** Dissociation constants, apparent (GREENSTEIN and JOSEPH) 619
**Glyoxalase:** Anti-, kidney (SCHROEDER, MUNRO, and WEIL) 181
**Goiter:** Thyroglobulin iodine and thyroxine (CAVETT, RICE, and MCCLENDON) 673
**Grapefruit:** Pink, pigments (MATLACK) 249
**Growth:** Naphthalene metabolism (STEKOL) 463

H

**Hair:** Cystine, cystinuria (LEWIS and FRAYSER) 23
**Heat:** Liver proteins, effect (SEEGERS and MATTILL) 531
**Hemicellulose:** Mesquite wood (SANDS and NUTTER) 17
**Homocysteine:** Metabolism, cystinuria (BRAND, CAHILL, and BLOCK) 399
**Homocystine:** Metabolism, cystinuria (BRAND, CAHILL, and BLOCK) 399
**Hydrogen ion concentration:** Gastrointestinal tract, determination, glass electrode (EASTMAN and MILLER) 255
**Hydrogen ion concentration**—*continued:*
Urine, glomerulus, *Necturus*, determination, microquinhydrone electrode (PIERCE and MONTGOMERY) 763
**Hypophysis cerebri:** Vitamin C distribution (GLICK and BISKIND) 583
*See also* Pituitary

I

**Iodides:** Sterol dibromides, action (SCHOENHEIMER) 461
**Iodine:** Biological material (TREVORROW and FASHENA) 29
Thyroglobulin, normal and goitrous (CAVETT, RICE, and MCCLENDON) 673
**Iron:** Biological materials, determination (FARRAR) 685

K

**Kidney:** Antiglyoxalase (SCHROEDER, MUNRO, and WEIL) 181

L

**Lactation:** Blood plasma lactose (HUBBARD and BROCK) 411
**Lactic acid:** Brain, mammalian (AVERY, KERR, and GHANTUS) 637
**Lactobiose:** Reactions, new (BERGMANN and GRAFE) 173
**Lactose:** Blood plasma, pregnancy and lactation (HUBBARD and BROCK) 411
**Lipids:** Blood plasma, diurnal variations (BOYD) 61

**Lipolysis:** Enzymes, adrenals, distribution (GLICK and BISKIND) 575
**Liver:** Disease, uric acid excretion, benzoic acid influence (QUICK) 107
Proteins, heat and alcohol, effect (SEEGERS and MATTILL) 531
**Lysine:** Fatty acids, combination (JUKES and SCHMIDT) 9

M

**Malt:** Barley, amylase, concentration and properties (CALDWELL and DOEBBELING) 739
**Malus malus:** *See* Apple tree
**Mesquite:** Wood, hemicelluloses (SANDS and NUTTER) 17
**Metabolism:** Bacteria (BLANCHARD and MACDONALD) 145
**Methylbenzylacetic acid:** Derivatives, methylphenethylacetic acid derivatives, configurational relationship (LEVENE) 323
Methylbenzylpropionic acid, configurational relationship (LEVENE and MARKER) 299
**Methylbenzylpropionic acid:** Methylbenzylacetic acid, configurational relationship (LEVENE and MARKER) 299
**Methyl-*d*-galacturonide:** $\beta$-, $\alpha$-acetobromo-*d*-galacturonic acid methyl ester, conversion from (MORELL, BAUR, and LINK) 719
**Methylheptylacetic acid:** Derivatives, methyloctylacetic acid derivatives, configurational relationship (LEVENE) 323
**Methyloctylacetic acid:** Derivatives, methylheptylacetic acid derivatives, configurational relationship (LEVENE) 323
**Methylphenethylacetic acid:** Derivatives, methylbenzylacetic acid derivatives, configurational relationship (LEVENE) 323
**Mineral:** Analysis, apparatus, evaporation, concentrated salt solutions (GUEST and LEVA) 777
**Monomethyltryptophanes:** Metabolism (GORDON and JACKSON) 151
**Mucin:** Dyes, staining (KELLEY and MILLER) 119
Thionine staining (KELLEY and MILLER) 119
**Muscle:** Oxidase, milk and, synergistic action (MACHT and BRYAN) 101

N

**Nails:** Cystine, cystinuria (LEWIS and FRAYSER) 23
**Naphthalene:** Metabolism, adult and growing dogs (STEKOL) 463
**Necturus:** Urine, glomerulus, hydrogen ion concentration determination, microquinhydrone electrode (PIERCE and MONTGOMERY) 763
—, —, reaction (MONTGOMERY) 749
**Nitrogen:** Metabolism, tissue, isolated (BORSOOK and JEFFREYS) 495

**Nitrogen**—*continued:*
Total, microdetermination (BORSOOK) 481
**Nucleoprotein:** Dyes, staining (KELLEY and MILLER) 119
Thionine staining (KELLEY and MILLER) 119
**Nucleus:** Substances, staining (KELLEY and MILLER) 113

O

**Oxidase:** Ascorbic acid (TAUBER, KLEINER, and MISHKIND) 211
Milk and muscle, synergistic action (MACHT and BRYAN) 101

P

**Pentose:** Urine, origin (ENKLEWITZ and LASKER) 443
**Pepper:** Pigments (BROWN) 91
**Peptides:** Multivalent (GREENSTEIN and JOSEPH) 619
Salts, complex (BERGMANN) 471
**Phenethyl acids:** Normal series, configurational relationship (LEVENE and MARKER) 311
**Phenolase:** Activity, determination (SAMISCH) 643
**Phosphocreatine:** Brain (KERR) 625
**Phosphorus:** Compounds, brain (KERR) 625
Inorganic, blood plasma, dairy cattle (HAAG and JONES) 439
**Phospho-18-tungstic acid:** Nonthiol compounds, reaction (SHINOHARA) 263
**Pigments:** Grapefruit, pink (MATLACK) 249
**Pigments**—*continued:*
Pimiento, Perfection (BROWN) 91
**Pimiento:** Perfection, pigment, red (BROWN) 91
**Pipette:** Gasometric analysis, air-free reagents, storage (GUEST and HOLMES) 781
**Pituitary:** Anterior, antidiuretic factor (DOWNES and RICHARDS) 81
*See also* Hypophysis cerebri
**Pneumococcus:** Types III and VIII, polysaccharides, capsular, chemical and immunological relationship (GOEBEL) 391
**Polysaccharide(s):** Pneumococcus, Types III and VIII, chemical and immunological relationship (GOEBEL) 391
Starch, apple tree woody tissue, isolation and properties (NIEMANN, ROBERTS, and LINK) 727
**Pregnancy:** Blood plasma lactose (HUBBARD and BROCK) 411
**Proline:** *l-*, determination, rhodanilic acid (BERGMANN) 471
**Propionaldehyde:** Reduction, *Clostridium acetobutylicum* (BLANCHARD and MACDONALD) 145
**Propionic acid:** Methylbenzyl-, methylbenzylacetic acid, configurational relationship (LEVENE and MARKER) 299
Reduction, *Clostridium acetobutylicum* (BLANCHARD and MACDONALD) 145

**Protein(s):** Azo- (Boyd and Mover) 457
Liver, heat and alcohol, effect (Seegers and Mattill) 531
Sulfur (Blumenthal and Clarke) 343
Tissue, composition (Graff and Maculla) 71
**Purines:** Tissue, determination (Graff and Maculla) 71

Q

**Quinhydrone:** Electrode, micro, urine, glomerulus, hydrogen ion concentration determination (Pierce and Montgomery) 763

R

**Rays:** $\alpha$, egg albumin solutions, irradiation effect (Arnow) 43
*See also* Roentgen ray
**Rhodanilic acid:** *l*-Proline determination (Bergmann) 471
**Roentgen ray:** Glutathione effect (Kinsey) 551

S

**Salmine:** Fatty acids, combination (Jukes and Schmidt) 9
**Sapogenin(s):** Desoxysarsa- (Simpson and Jacobs) 565
Digitalis (Jacobs and Simpson) 429
Sarsa-, degradations (Simpson and Jacobs) 565
**Sarsasapogenin:** Degradations (Simpson and Jacobs) 565
**Sodium:** Microdetermination (Weinbach) 95
**Starch:** Polysaccharide, apple tree woody tissue, isolation and properties (Niemann, Roberts, and Link) 727
**Sterol dibromides:** Iodides, action (Schoenheimer) 461
**Sulfur:** Metabolism (Lewis and Frayser) 23
Proteins (Blumenthal and Clarke) 343
**Suprarenals:** *See also* Adrenals

T

**Thiol compounds:** Determination (Shinohara) 263
**Thionine:** Nucleoprotein and mucin staining (Kelley and Miller) 119
**Thyroglobulin:** Iodine and thyroxine, normal and goitrous (Cavett, Rice, and McClendon) 673
**Thyroid:** Thyroxine, determination (Blau) 351
**Thyroxine:** Thyroglobulin, normal and goitrous (Cavett, Rice, and McClendon) 673
Thyroid, determination (Blau) 351
**Tissue:** Purines, determination (Graff and Maculla) 71
**Tryptophanes:** Monomethyl-, metabolism (Gordon and Jackson) 151

U

**Urea:** Microdetermination (Borsook) 481
**Uric acid:** Excretion, exercise effect (Quick) 107

**Uric acid**—*continued:*
—, liver disease, benzoic acid influence (QUICK) 107
Microdetermination (BORSOOK) 481
**Urine:** Glomerulus, hydrogen ion concentration determination, microquinhydrone electrode, *Necturus* (PIERCE and MONTGOMERY) 763
—, reaction, frog and *Necturus* (MONTGOMERY) 749

V

**Vitamin(s):** B synthesis, digestive tract, carbohydrate effect (GUERRANT, DUTCHER, and TOMEY) 233
$B_2$. *See also* Vitamin G
C, adrenals, distribution (GLICK and BISKIND) . 1
**Vitamin(s)**—*continued:*
—, determination, enzymic (TAUBER and KLEINER) 559
—, hypophysis cerebri, distribution (GLICK and BISKIND) 583
—. *See also* Ascorbic acid
E, absorption spectrum (OLCOTT) 695
—, chemical constitution (OLCOTT) 695
—, esters, utilization (OLCOTT) 695
G, photochemical phenomena (SUPPLEE, ANSBACHER, and BENDER) 365

X

**X-ray:** *See* Roentgen ray
**Xyloketose:** *l*-, origin (ENKLEWITZ and LASKER) 443

HILL REFERENCE LIBRARY ST. PAUL
